HQ Kites & Designs USA, a fully owned subsidiary of Invento GmbH, handles sales and distribution of recreational products into North & South America.

Our distribution and sales facility has a home near the Outer Banks of North Carolina where we deliver customer service, expedited shipping and product knowledge to specialty retailers, along with new and innovative products to ensure your business continues to thrive in an ever-changing marketplace. Our expanding line of innovative toys, kites, outdoor accessories, garden décor and gifts puts HQ ahead of the curve by offering the Buyer a One Stop Shopping experience that rivals all others.

HQ Kites & Design USA provides only the highest standards of customer service and our top priority is to make your business a success.

Join us today for a brighter, profitable and more playful tomorrow.

Playing outdoors promotes a healthy lifestyle and flying kites will get you and your family on the road to happiness.

Our varied and unique line of single, dual and quad line kites provide endless hours of fun while providing a stepping stone environment for physical fitness and learning through the use of tethered flight.

For the adventurous and action minded, HQ4 has an attractive line of traction kites and accessories.

Whether your customer is new to the sport or looking for something new to try, HQ4 has everything they need to get started, improve snowkiting, kite buggying & landboarding. Engineered and field tested by our European designers, these high quality wings are ready for action!

Home is where the heart is and Windspirations provides a range of decorative items that convey a lovely message about your home.

An HQ original, Windspirations pioneered the garden spinner category in the mid-90s. Today, we stock a wide variety of artfully crafted designs to add a bit of elegance and color to your garden or home. Make a bold statement with a design created with you in mind.

We endeavor to keep people interested and learning new things.

Our expanding line of toys, gifts and gadgets feature their own catalog. Inside you'll find quality outdoor toys and games with Great Price Points. HQ Kites carries a spectrum of toys; from toys that get you outside and playing hard to creative play when the weather keeps you indoors.

WOODEN CITY

More information: www.hqkitesusa.com

WOODEN CITY – wooden mechanical models:

- ▶ Natural materials – all 3D model kits made from sustainably sourced birch wood
- ▶ Assembly of sets does not require any glue or tools
- ▶ Mechanical functions – all models produce motion (hand spun or rubber band propulsion)
- ▶ Moving parts are sturdily constructed (e.g. stable and solid axes) and different from competitors
- ▶ Unique 3D wooden models provide a variety of functions and work without any electronic components
- ▶ Easy assembly – ready-to-assemble parts are laser-cut
- ▶ All sets come in attractive and unique packagings (wooden boxes)
- ▶ Made in European Union
- ▶ Unique designs make all 3D wooden models popular collection models
- ▶ All functional models are not children's toys
- ▶ Age: 14+

Jeep 4x4

Today the "Jeep" is a synonym for an expensive off-road vehicle. During WWII, the American company Willys started production of the Willys MB automobile. It went down in history as a reliable, manoeuvrable and functional vehicle. It was a "technical breakthrough". There was a real "war of engines". Overcoming of obstacles, road dust and risk – you have a real adventure in your hands! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Jeep. After assembly, you need to set the position of the lever forward or backward, set the locking lever in the stop position, start the model with the key and lower the lever (the key is located in the spare wheel). The front wheels are steered. Open and fix the hood by two locks and tilt the windshield. The Jeep can boast further exciting features – four-wheel drive transmission, independent suspension on both axles, internal combustion engine with moving pistons, 3 moving pedals (which are resiliently pressed with an additional rubber band), rear-view mirror, removable shovel, axe and canister. The Jeep runs up to 4 meters and is a real find for those who are fond of history and adventure. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Jeep will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 564

Assembly time: approx. 12 hours

Skill level: Advanced

Model size: 7.05" x 5.94" x 5.83"

Packaging size: H9.45" x W13.98" x D2.01"

Art. Nr. 502337

Trailer

Now complete your Wooden City Jeep 4x4 with the detailed military trailer. The trailer is provided with a suspended axle. A special lever makes it possible to tilt the loading area, the rear loading flap can also be opened. A removable reserve canister as an accessory gives the trailer that last little touch. The trailer has a hitch and can be easily connected to the Jeep 4x4.

London Bus

Have you ever been to London before? Are you a 3D puzzle geek like us? Plunge into the vibrant London atmosphere by building our Wooden City 3D mechanical model – the famous London double-decker! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the London Bus. There are two trigger levers installed in this London Bus model to operate the speed level (speed control trigger) and the bus driving direction (direction control trigger). Listen to the engine sounds that we meticulously crafted in the manufacturing process to provide a more realistic driving experience. The London Bus rubber band engine operates in 2 speeds and is the most powerful on the market – the London Bus runs up to 4 meters. But that's not all! The London Bus has three passengers whose safety will be in your hands. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The London Bus will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 216

Assembly time: approx. 6 hours

Skill level: Advanced

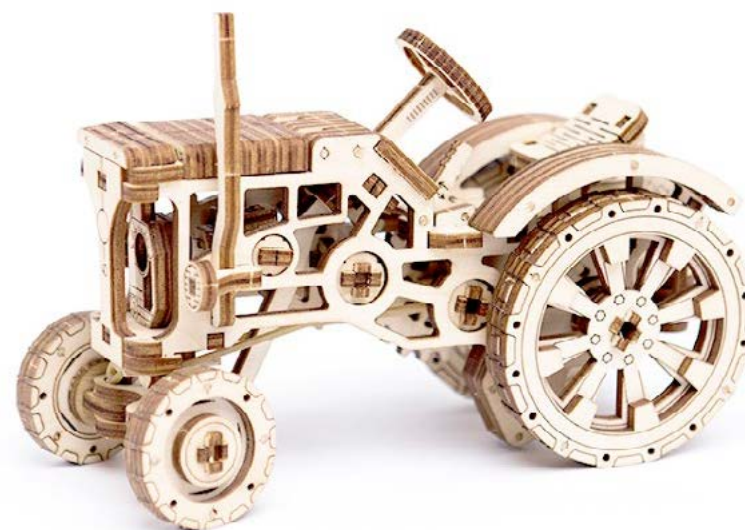

Model size: 9.21" x 2.76" x 4.53"

Packaging size: H9.45" x W13.98" x D1.57"

Art. Nr. 502326

MOQ	CP	MC
1	-	9

Tractor

The "Tractor" is based on tractor models from the last century and powered by gearwheels. Interesting details and many moving parts give the Tractor its very special charm. The tractor has a chassis and large rubber-coated wheels. The sophisticated design of the tractor is reflected in the details: dashboard, ribbed steering wheel, bucket hanging from a hook. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 164

Assembly time: approx. 3 hours

Skill level: Medium

Model size: 6.22" x 4.69" x 2.83"

Packaging size: H6.89" x W9.45" x D1.10"

V8 Engine

Do you know "The Fast and the Furious" and would you like to be like Dominic Toretto? Take the chance and build your own Wooden City V8 engine without glue and with many moving parts. The parts are set in motion by means of a horizontally rotating gearwheel: eight moving pistons then work reliably in the cylinders and the radiator fan also rotates. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 200

Assembly time: approx. 2 hours

Skill level: Medium

Model size: 5.51" x 3.94" x 4.21"

Packaging size: H6.89" x W9.45" x D1.10"

Art. Nr. 502347

MOQ	CP	MC
1	-	26

Biplane

Would you like to build your own airplane in less than 2 hours? Do you enjoy 3D wooden model kits as much as we do? Then go ahead with the Wooden City Biplane model. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with adjustable acceleration and start the Biplane - the Biplane runs up to 0.5 meters. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Biplane is an amazing gift for anyone with a passion for airplanes with geared engines. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 63

Assembly time: approx. 1.5 hours

Skill level: Easy

Model size: 6.34" x 5.51" x 3.46"

Packaging size: H6.89" x W9.45" x D1.10"

Express Train + Rails

The Wooden City locomotive is a mechanical masterpiece reminiscent of the steam wheels of bygone times. The model is powered by a rubber motor and gears, but all other functions (e.g., pistons, valves, cylinders, connecting rods, drive rods) are very close to those of a real steam locomotive. A detailed cabin, the boiler cladding and functioning doors and flaps make the steam locomotive a fascinating model in the Wooden City range. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

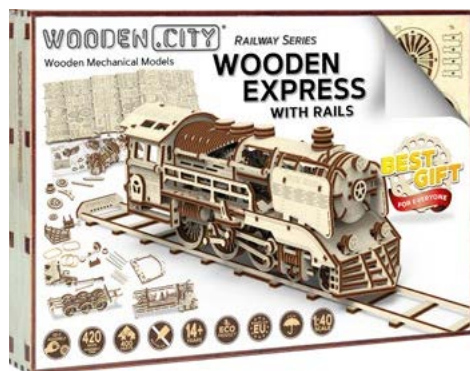

Number of parts: 384

Assembly time: approx. 7-8 hours

Skill level: Advanced

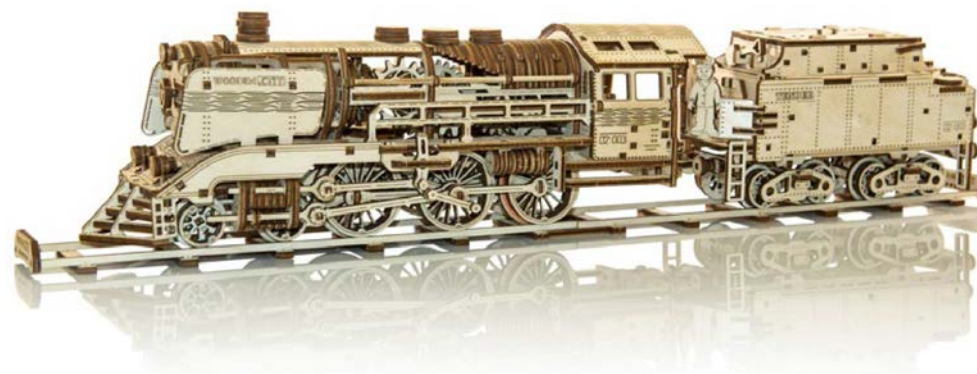

Model size: 13.78" x 4.80" x 4.33"

Packaging size: H9.45" x W13.98" x D1.57"

Art. Nr. 502370

MOQ	CP	MC

Safe

This model of Wooden City is a real safe with combination lock – it can be opened with a secret number combination of 3 digits. The code can be changed at any time. If the code has been forgotten, the safe can be opened with a secret function (this method is described in the manual). If the combination was correct, the safe opens automatically when the third digit is entered. To lock the safe again, just close the door and turn the knob – the safe locks itself. The safe is the perfect model for hiding banknotes or other valuables. With handle for easy transport. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

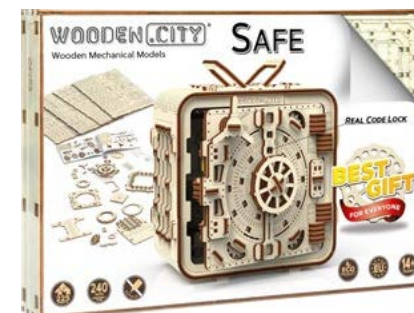

Number of parts: 202

Assembly time: approx. 4 hours

- ▶ Elegant collectibles - the perfect decoration for living room and office
- ▶ For young and adult inventors with a passion for technology
- ▶ Age: 14+

Time Creator

Do you remember the legendary James Bond's wristwatch in the "Live and Let Die" movie (1973). The electronic display of this watch lit brightly red. At that time, it seemed to be science fiction. Now the brand-new Time Creator from Time For Machine - an electronic watch which is also a construction set - is reminiscent of the days when electronic devices still had cult status. The Time For Machine Time Creator's watch case and bracelet are easy to assemble, comfortable to wear and a real pleasure to touch. The board with the indicator, a USB slot for charging and all buttons come as ready-made parts of the set. The bracelet can be adjusted to the most comfortable length. Showing current time is not affected by complete discharge or disconnection of the battery. Besides showing the current time, Time Creator has a number of convenient functions and shows plenty of useful environmental data.

- ▶ Material: stainless steel
- ▶ Size of watch case: W2.5" x H1.5" x D0.6"
- ▶ Air humidity (%)
- ▶ Atmospheric pressure (pascals / millimeters of mercury)
- ▶ Temperature (°F / °C)
- ▶ Set mode buttons
- ▶ Screen brightness (mechanical)
- ▶ ON / OFF
- ▶ Time format: 12 / 24 hours
- ▶ Date format: DD / MM / YYYY
- ▶ A wooden stand is included in the kit.

Heavenly Hercules

The Heavenly Hercules is reminiscent of the visionary flying boats of the past with their impressive numbers of engines and huge wing spans. Heavenly Hercules is provided with 8 propellers which are set in motion simultaneously by a spring drive in the base of the model. Take the plane off the base and study its impressive details. Scale: 1:300. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- Contents: 4 metal plates with parts, 15 additional gears, pre-assembled spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- Number of parts: 231
- Model size: 12.80" x 8.86" x 5.12"
- Packaging size: 17.72" x 7.87" x 1.38"

Dazzling Steamliner

The Dazzling Steamliner is a model from the universe of steampunk and dieselpunk, which resembles historical steamliners covered in a sleek aerodynamic body. The Dazzling Steamliner looks futuristic and fascinating and is the top model in the Time for Machine range. A spring drive sets the model in motion with many moving parts. Observe the movements of gearwheels and flywheels inside the train. The layout of the wheels is reminiscent of the famous Union Pacific Big Boy. The wheelbase of the locomotive is 4-12-6. Model scale: 1:64. Rail width: 24 mm. The coal tender can be unhooked from the locomotive. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- Contents: 7 metal plates with parts, 38 additional gears, pre-assembled spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- Number of parts: 256
- Model size: 19.53" x 2.60" x 2.36"
- Packaging size: 17.72" x 7.87" x 1.38"

Starbreeze Explorer

Starbreeze Explorer is reminiscent of Space Shuttle program in which shuttles have made more than a hundred trips with many breakthroughs in the exploration of space. The model consists of several parts (Space Shuttle, accelerator unit, stand), which impress by their fascinating details and can be connected to each other: Swinging cargo hold flaps, a spring drive which allows the shuttle to make several spins around its axis, the stand is designed according to the coastline of Cape Canaveral. The model can also be placed vertically on the stand. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- Contents: 3 metal plates with parts, 11 additional gears, pre-assembled spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- Number of parts: 155
- Model size: 9.96" x 4.65" x 9.35"
- Packaging size: 14" x 7" x 1.38"

Chrome Rider

The Chrome Rider is the perfect model for real motorcycle fans and impresses with its engineering out of the ordinary. The Chrome Rider is not driven by a spring, but by a massive flywheel in the center of the vehicle. Driven by this flywheel the Chrome Rider can easily cover a distance of up to 10 meters while reliably maintaining its balance, additionally supported by the movable steering fork. The wheels are mounted on bearings for a particularly smooth run and the treads are made of rubber for better traction. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- Contents: 3 metal plates with parts, 6 additional gears, 4 bearings, 4 rubber treads for the wheels, pliers, file, gloves, cloth for polishing, instruction manual
- Number of parts: 90
- Model size: 5.9" x 2.64" x 2.36"
- Packaging size: 12.87" x 5.55" x 1.06"

Medieval Hockey

Medieval hockey is the classic in the Time For Machine range. Many details have now been thoroughly revised: model size, format of the playing field, mechanism of the figures and the way they are put together. In Medieval Hockey, 2 players play against each other, each controlling 3 players on the field: goalkeeper, defender and striker. The object of the game is to move a small black hockey puck around the field and score a goal. Age: 14+

- Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- Contents: 3 plates with parts, 6 additional gears, plastic puck, pliers, file, gloves, cloth for polishing, instruction manual
- Number of parts: 87
- Model size: 9" x 5.1" x 3.35"

Smart cars and stylish water crafts! The Invento "power & control" RC series makes the dream of driving speedy cars and boats come true for everyone. All models impress with their smart design, innovative engineering, great extras, and a robust design.

RC Mini Tank

Small, very fast and agile 3-channel Tiger tank with realistic details. Available in assorted colors. This tank masters smaller obstacles effortlessly:

- Scale: 1:72
- Tank size: L4.72" (incl. gun) x W1.4" x H2"
- LED illumination while driving, sound function
- 3-channel remote controller (right, left, forward, backward, 360-degree turns, 360-degree turret rotation) with well-integrated charging cable and charging indicator
- 360-degree turret rotation, Turbo function
- Frequency: 27 + 49 MHz
- Attractive gift box
- Operating time: approx. 10 minutes
- Charging time: approx. 6 minutes
- Range of remote control: approx. 7 m
- Age: 8+

Contents: RC Tank, remote controller with charging cable, instruction manual.

Recommended accessories for the remote controller:
4 x AA 1.5V batteries (not included).

Eight Retro Radio

This great kit contains all the components you need to build your very own piece of retro cool – a 1970's style working FM radio. Includes full instructions in the shape of a mini Eight manual. The perfect gift for 'build your own' fans or lovers of all things retro! No soldering needed! Clear step-by-step instructions. Requires one 9 V battery (not included). This is not a toy. Not suitable for children under 14 years of age.

Franzis Ford Mustang V8 Engine

A star is born! Series production of the first generation of the Ford Mustang began in 1964. Since then, the "Pony Car" has become the epitome of the American sports car. What made this legendary automobile with its emblematic running horse on the radiator grille so distinctively charming was its sporty image combined with high-performing, reliable technology under the hood. Build a transparent, functional model of the formidable V8 engine from the 1965 Ford Mustang. The enhanced 289 K-Code V8 High Performance engine produced a captivating 271 HP at 6,000 revolutions per minute, and a maximum torque of 321 lb-ft (423 Newton meters) at 3,400 rpm. The assembly kit uses a scale of around 1:3 and contains approximately 200 individual pieces. In two to three hours, you'll build a finely detailed, transparent Ford Mustang 289 K-Code V8 model engine with original motor sound. All of the model parts move exactly as they do on the original, life-size model. The components fit together easily, either as interlocking pieces or with screws – no glue required. The Ford Mustang kit comes with an exclusive 100-page booklet, complete with top-notch details and numerous stunning illustrations that guide you through the history of the Ford Mustang while outlining the technology that lies under the hood. The handbook contains a detailed and generously illustrated step-by-step guide that will lead you through the construction of the engine kit with clear instructions. Additionally required: 3 x 1.5V batteries (AA). Age: 14+

Eight Bat Detector

This kit makes finding bats an easy and fail-safe exercise: The board is already equipped with numerous SMD components. You only have to put together a few parts yourself and wire the board with microphone, loudspeaker and the setting controls. Modern integrated circuits provide high sensitivity and volume. With the finished detector, the ultrasound calls of bats can be made audible. This way you can track down these fascinating flying artists in the dark even where they are otherwise completely unnoticed in the hunt for insects. Requires one 9V battery (not included). Construction complete without soldering! This is not a toy! Not suitable for children under 14 years of age.

whimsy shapes

double-sided puzzle pieces

Launched with an eco-friendly, ecological mindset, Wooden City Puzzles combine the enjoyment of a high quality, double-sided wooden jigsaw puzzle with the magic of whimsical, non-traditionally shaped pieces. Discover how each one-of-a-kind puzzle is a story and adventure that will carry your imagination away. Every Wooden City Puzzle contains numerous unique 'whimsies' that are characters, figures, and symbols cut seamlessly into the pattern and create little surprises. These challenging puzzles offer a rich beautiful image on the front and a detailed wallpaper style pattern on the back.

- ▶ Double-sided puzzle pieces with thematic whimsies
- ▶ High quality – laser cut from 4 mm high density fiberboard (HDF)
- ▶ Environmentally friendly packaging – only cardboard and paper, no plastic
- ▶ Supports concentration, memory and fine motor skills
- ▶ Made in Poland
- ▶ Ages: 8+

► C-bionic - Bionic Toys

C-bionic was created by German product designer Marcel Pasternak as a way to introduce important STEM-based skills to children. Through creative building, they are able to replicate organic actions found in nature and learn about potential energy and such principles as flexibility, elasticity, friction, levers and pivots. The patent-pending flex-brick design allows for inventive, multi-functional play that can also interact with existing building bricks, such as LEGO® Technic and similar brands.

C-bionic Scorpion Grip + Sting 2-in-1-Set

Bionic simply means a blend of biology and technology. Integrating these two elements together allows us to create incredible inventions that simplify our daily lives. Unleash your kid's curiosity with C-bionics' educational toys. This advanced building kit allows you to construct a scorpion bionic glove that can be configured either as a claw or stinger depending on how you assemble the STEM toy. Encourage future engineers and spark your child's passion for nature with C-bionics' advanced construction toys.

- The Scorpion Grip + Sting is a STEM toy with focus on biology and technology
- Unique flexible construction bricks
- Patented innovation from Germany
- 2-in-1 model (Gripper and Stinger)
- Model sizes: 7.1" x 6.3" x 3.5" (Gripper), 10.6" x 4.3" x 7.1" (Stinger)
- Action loaded packaging design - Premium unboxing experience
- Easy to follow step by step instructions - Video instructions online
- Additional booklet with information about scorpions
- Hidden special: High Quality poster inside
- Packaging size: 10.2" x 7.9" x 2.4"
- Contents: 100 construction bricks, instruction manual, additional information about scorpions, high quality poster
- Age: 7+

C-bionic Turtle + Clam 2-in-1 Set

Learn as you build and play with the 2 in 1 Turtle + Clam kit from C-bionics. Once constructed, these turtles use their flippers and have a fluid swimming motion just like real turtles in water. These ancient sea creatures can swim, roll, dive, and play, as their flippers effortlessly glide back and forth using nature inspired mechanics. When configured in clam mode, the shell organically hinges open and close to replicate the real-life pearl holders. These STEM friendly, patented flexible building bricks help spark your child's curiosity and passion for nature with the C-Bionics Turtle or Clam.

- ▶ The Turtle Set is a STEM toy with focus on biology and technology
- ▶ Unique flexible construction bricks
- ▶ Patented innovation from Germany
- ▶ 2-in-1 model (Turtle and Clam)
- ▶ Model sizes: 6.7" x 7.5" x 2.4" (Turtle), 3.9" x 3.9" x 3.9" (Clam)
- ▶ Action loaded packaging design - Premium unboxing experience
- ▶ Easy to follow step by step instructions - Video instructions online
- ▶ Additional booklet with information about Green Sea Turtles

C-bionic Seahorse + Fish 2-in-1 Set

The C-bionics Seahorse + Fish construction kit offers a 2 in 1 experience that is inspired by nature. In water, a seahorse moves up and down floating with the current as does this educational STEM friendly toy. The tail curls up and down, the fins swim back and forth, and the head moves fluidly just like the real thing. When assembled as a fish, enjoy how the tail acts as a rudder and smoothly rocks back and forth as the flexible fins slides through the water. Experience the fun of nature with C-bionic, as it inspires learning about science and energy in a fun, exciting, and creative way.

- ▶ The Seahorse Set is a STEM toy with focus on biology and technology
- ▶ Unique flexible construction bricks
- ▶ Patented innovation from Germany
- ▶ 2-in-1 model (Seahorse and Fish)
- ▶ Model sizes: 11.4" x 5.9" x 2.8" (Seahorse), 9.5" x 5.9" x 3.5" (Fish)
- ▶ Action loaded packaging design - premium unboxing experience
- ▶ Easy to follow step by step instructions - Video instructions online
- ▶ Additional booklet with information about Seahorses
- ▶ Packaging size: 10.2" x 7.9" x 2.4"
- ▶ Contents: 130 construction bricks, instruction manual, additional information about Seahorses
- ▶ Age: 7+

► Airglider

With wings made of extra strong rip-stop fabric and a fiberglass and carbon composite frame, our gliders are robust and more durable than conventional models. With their graceful lines and delicate aerobatic manoeuvres these gliders offer a feast for the eyes while they soar through the sky. Our Airglider offers the flyer many alternatives to experiment with the flight experience. You are encouraged to add or subtract ballast and adjust the wings to alter the flight characteristics.

Airglider 40

Start with: Handstart, rubber band catapult (incl.)
Wingspan: 16", Length 18", Sail: Ripstop-Polyester, Fuselage: Carbon, Age: 6+

► Slackline & Flash Roller

All people need to practice slacklining are two adequate objects to affix this balance strap to (e.g. trees or poles). This incredibly dynamic sport requires a different set of skills and abilities and encourages people to develop an excellent sense of balance. Slacklining also helps climbers, skiers, martial artists, horsemen, vaulters, surfers and many other sportsmen to develop good reflexes and an excellent sense of balance. With a width of 2" our slack line is easy to handle and enables unexperienced slackline enthusiasts to experience this great sport.

Slackline
